

Jonah Alligood

Highly motivated software engineer with nearly four years of professional experience. Particularly strong in the areas of web technologies and backend development. Looking for new opportunities offering tech ownership and meaningful impact with the ultimate goal of adding value to the organization.

EXPERIENCE

World Wide Technology, St. Louis, MO — *Developer*

FEBRUARY 2022 - PRESENT

- Developed an internal risk management tool in React and Spring Boot using Agile and TDD principles.
- Developed and tested EDI and RosettaNet integrations with partners using webMethods and PL/SQL.
- Developed and tested internal applications for the purposes of monitoring partner integrations and managing hardware and software rebates with select vendors.
- Supported team in an on-call rotation to ensure that our integrations were running smoothly, and take care of any maintenance windows.

DataAutomation, Athens, GA (Remote) — *Backend Developer*

AUGUST 2021 - NOVEMBER 2021

- Developed e-commerce integrations between platforms used by our clients.
- Developed and maintained an internal framework responsible for queuing and running client integrations.
- Spoke directly with clients to scope and specify project requirements.
- Worked with various e-commerce related API's like Amazon, Shopify, ShipStation, etc.

Precision Planting, Peoria, IL — *Junior Software Engineer*

JUNE 2019 - AUGUST 2021

- Developed a memory mapping command line tool for the purpose of converting various ELF dump formats into a unified internal file format to be parsed at a later date by an in-house debugger.
- Worked with a small team to develop and maintain an in-house CAN bus reader and writer.
- Created and owned another command line project to generate C++ type definitions for CAN bus packets to be used in other software.
- Maintained parts of the 20|20 in-cab device orchestrator and data reader.

EDUCATION

University of Illinois, Springfield, IL — *B.S. Computer Science*

AUGUST 2018 - AUGUST 2022

Saint Louis, MO

(309) 750-7752

SKILLS

Javascript, Typescript, React, Vue, Node, Express, Tailwind, C++, PHP

PROJECTS

Cube With Me (2022)

- Developed a speed cubing website for users to race one another.
- Service included the ability to create and join rooms.
- Implemented WebSockets to functionally drive the backend state of rooms.

JEngine2D (2020)

- Created a 2D game engine mostly for myself for use in Ludum Dare game jams.
- Supports OpenGL 3+ for rendering.
- Includes features like sprite sheets, font rendering, and audio playback.

Just Listen (2019)

- Created a service for musicians to link their discography on every platform.
- Developed a Spotify integration to import an artist's existing discography.
